

Existing Fluorescent fixtures converted to LED (*using EAI's plug and play system*)
Brighten and Clean Cabin Appearance!

SkyWest Selects Erie Aviation for Cabin Lighting

September 15, 2017

SkyWest Airlines has selected Erie Aviation Inc., Plug n' Play "Fluorescent to LED" conversion kits, for its CRJ-200 fleet. The Kits allow existing fixtures and wiring to remain in the cabin, eliminating costly installation time and labor. Kits can be installed during scheduled overnight maintenance. Combined with EAI's LED Reading Light bulbs, brings the cabin a new Fresh look and New Generation Aircraft feel. SkyWest operates approximately 200 CRJ-200 aircraft throughout the U.S.
